

# ATTENTION RACERS!

As you may be aware, TMP has had a few problems with the timing system this season. Some of which were due to a lightning strike and others of a technical nature. A few weeks ago, there was an issue with timeslips which was rectified on August 26th and has worked perfectly ever since. The system has been tested and re-tested and everything at this point is working properly. We are confident that we have the issues resolved. We apologize for any inconvenience this may have caused and thank you for your patience.
